

Let's work together for cleaner, healthier air in our community spaces across Michigan. If your organization serves vulnerable populations in shared indoor spaces, you may be able to take part in a program to improve air quality and create safe environments for everyone.

The Michigan Department of Health and Human Services (MDHHS) Community Health Innovation & Promotion Section (CHIPS) team is excited to share an important collaboration opportunity. MDHHS launched the MI Indoor Air Ventilation Program in December 2022. **This program provides an additional mitigation strategy for clean air and respiratory illnesses such as asthma, RSV and COVID-19. Supplies are limited and will be offered on a first come, first served basis.**

MDHHS has teamed up with a leading supplier of safety and prevention equipment, and a manufacturer of portable air cleaning systems, to serve our partners in the state of Michigan.

Get Involved.

This partnership with MDHHS will be at no cost to your organization while supplies last.

To express interest in the MI Indoor Air Ventilation Program, please click the button below to complete the form.
