We Notarize
Signatures, Not
Documents

A notary public is an officer commissioned by the state to serve as an unbiased and impartial witness to signatures on business, public and other documents.

The most common function of the notary is to prevent fraud by attesting to the identity of a person signing a document.

A notarization on a document certifies that the person whose signature is entered on the document personally appeared before the notary, established his or her identity, and personally signed the document in the presence of the notary.

If you have never issued an oath, or don't know how, and don't know when to do so, this class is for you!
