

Woodlands Library Cooperative's
Children's & Teen Services Committee presents

Webinar on Coding and Robotics for Youth Services Librarians

**Friday, September 13, 2019
3:30pm to 4:30pm**

Want to offer coding or robotics opportunities for your patrons, but have no idea where to start? Join us for a webinar-based conversation with Associate Computer Science Professor, Dr. Jim Huggins from Kettering University.

Dr. Huggins will discuss a number of simple activities for exposing middle school and high school students to computer science. All of the activities require little-to-no computing background for participants (or their leaders!) and some can be done without using computers at all.

Free for all to attend!

Registration is open!
